DETAILED ACTION

Applicant's response of 4/16/07 has been considered with the following results.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

1. Claims 3,5,6, and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In particular claim 3 depends from canceled claim 2, while claim 5 depends from canceled claim 4. As presented, these claims are not understood since their respective parent claim has been canceled. Appropriate correction is respectfully required. Dependent claims 6 and 7 also fail since they depend upon claim 5.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1,3,5-12 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure, which is not enabling. The ability of determining which mode of operation is critical or essential to the practice of the invention, however; there is no disclosure as found to permit such a conclusion/determination.

As presented in the ultimate wherein clause in each of the independent claims 1, 11 and 12, and as argued, applicants' invention is drawn to a determination of which mode of operation is faster.

This is drawn to the second embodiment, starting at paragraph 58 of the corresponding PGPUB 2004/028103.

Art Unit: 2627

As detailed in figure 4s32 determines whether a cd or DVD is present. At this stage, the determination is:

- a) same as that of the first embodiment – as stated in paragraph 60 of the PGPub,
- b) already determined.

Hence there is no ability/capability as required by the ultimate wherein clause of the independent claims. Rather, the selection is performed as that of fig. 2, which is a determination based upon either the automated mode (determination mode), or the prompting mode (selecting mode).

The remaining dependent claims fail to clarify the above and fall accordingly.

Since the claimed subject matter is not supported by the disclosure, no ART rejection is presented.

Conclusion

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
